April 19, 2023, 5 p.m. – 8 p.m. | Union Jack's, Columbia, Maryland

MASFA Dinner Meetings – Get Yourself Connected

Wednesday, April 19, 2023, 5 – 8 p.m. Our dinner meeting is the best place in the Northern Virginia, Washington and Baltimore region to network with people in the cold-formed steel industry: Contractors, suppliers, manufacturers, and designers are always part of the mix. Our dinners provide you the opportunity to:

- 1) Network with industry colleagues during our cocktail hour.
- 2) Learn about important industry topics (many of which include continuing education credits) from various industry experts.

Topic: The Chain of Risk in CFS Projects

1.0 PDH

Speakers: Michael B. Heatwole, Executive Vice President, Partner - Ames & Gough
Lauren Martin, Risk Manager and Claims Specialist - Ames & Gough

Continuing Education Credits Available: 1.0 Engineering PDH Credits

Agenda Highlights: In the construction of cold-formed steel (CFS) projects, contractors and drywall subcontractors are typically required to hire a specialty engineer to perform the delegated design of the structural CFS framing. But what risks does the contractor take in hiring the delegated design engineer under their contract? Is the contractor responsible or liable if there are design mistakes by the specialty engineer, and is the specialty engineer responsible if the contractor doesn't build something correctly? And what is that certificate of insurance (COI) that projects require of the specialty engineer and what do all of those different insurance policies cover? Who can be considered an "additionally insured" party, and how does that differ from a "Certificate Holder"? This presentation will discuss all of the questions above, and also answer any other questions regarding risk, liability and insurance on CFS projects.
